PARV JAIN

NMIMS, MUMBAI | +91 9137401680 | parvvvjj@gmail.com | LinkedIn | GitHub

Data Science undergraduate at NMIMS with hands-on experience in NLP, time-series forecasting, and full-stack ML deployment. Skilled in building end-to-end data products - from model training to interactive dashboards and cloud-deployed applications.

EDUCATION

B.Tech in Data Science (Pursuing) | MPSTME, SVKM's NMIMS, Mumbai (2022 – 2028) | CGPA: 3.68 / 4

Lilavatibai Podar High School, Mumbai (2022) | 10th Percentage: 87%

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript
- **ML & NLP Frameworks:** PyTorch, Scikit-learn, HuggingFace Transformers, Groq
- **Data Analysis & Visualisation:** Pandas, NumPy, Matplotlib, Seaborn, Plotly
- **Web & Frontend:** React, Flask, Streamlit, HTML, CSS
- **Databases:** PostgreSQL, MySQL, SQLite, Supabase
- **Tools & Platforms:** Git, Jupyter, Power BI, Tableau, Figma, Android Studio, DBeaver, XAMPP, Render, LLM Prompt Engineering

RELEVANT COURSEWORK

- **Mathematics & Statistics:** Probability & Statistics, Linear Algebra, Calculus, Stochastic Processes
- **Computer Science:** Data Structures & Algorithms, OOP, Operating Systems, DBMS
- **Data Science & AI:** Statistical Structures in Data & Inference, Introduction to Data, Signal & Image Analysis

PROJECTS

SentIQ - AI-Powered Market Intelligence Dashboard | Python · Streamlit · RoBERTa · DeBERTa · Groq · Plotly (2026)

- Built a full-stack dashboard transforming customer reviews into business insights via sentiment classification and aspect-based analysis.
- Benchmarked SVM (82.5%), BERT (83.2%), and RoBERTa (87.6% accuracy, 0.88 F1); deployed class-weighted RoBERTa as production model.
- Implemented DeBERTa-v3 aspect-based sentiment analysis across 6 product dimensions for granular feedback decomposition.
- Integrated LLM analyst panel (Groq - LLaMA 3.3 70B) with custom context builder; built dashboards with KPI cards, trend analysis, and smart filtering.
- Deployed on Streamlit Community Cloud (Live Demo)

Predictive Policing - Crime Prediction & Hotspot Analysis | Python · LSTM · Prophet · PyTorch (2025)

- Developed a time-series forecasting framework across 705 Indian districts and 25 crime categories using 9 years of government data.
- Benchmarked Prophet (36.88%), NeuralProphet (61.37%), and LSTM (93.79%); selected LSTM as the production forecasting engine.
- Built hotspot identification generating district-wise forecasts for 2023–2025; developed a web dashboard for visualisation; paper targeting publication.
- Designed a custom accuracy metric and implemented an 80/20 temporal train-test split to ensure objective and reproducible model evaluation.

Dark Patterns in Food Delivery Apps | Python · Scikit-learn · K-Means · HTML (2025 – 2026)

- Surveyed 219 Zomato and Swiggy users and built a weighted Manipulation Score (out of 42) that rates six categories of dark patterns by severity.
- Ran 5 statistical tests and found a significant link between the Manipulation Score and unplanned purchases ($r = 0.38$, $p < 0.001$). Swiggy scored 2.67 points higher than Zomato ($p = 0.026$), and the average overspend was 68.6%.
- Grouped users with K-Means ($k = 3$) into three behavioural types (Easy Target, Aware but Affected, Immune User), and modelled purchase behaviour with Logistic Regression (61.5% accuracy, 5-fold CV) and Linear Regression ($R^2 = 0.134$).
- Built a self-contained HTML dashboard with a live Risk Predictor that uses the logistic regression coefficients.
- Deployed on GitHub Pages (Live Demo)

EXPERIENCE

Data Analyst Intern | Smile Foundation (June 2025)

- Led an education and community development project from planning through execution, working with cross-functional teams.
- Tracked project KPIs through data analysis and turned the findings into insights for stakeholders.
- Handled project reporting, documentation and stakeholder updates throughout the internship.

POSITIONS OF RESPONSIBILITY (POR)

Sub-Head, Technical Committee | IETE-SF (Student Forum), NMIMS (2024 – 2025)

- Managed content creation, video production, and photography for technical events and chapter outreach.
- Coordinated logistics and promotions for workshops and competitions alongside the core committee.

CERTIFICATIONS AND ACHIEVEMENTS

- Claude Code in Action - Anthropic (Certificate of Completion), Oct 2026 (Verify)
- Smart India Hackathon 2025 - MPSTME Ideathon, Team FieldVision (AI-Based Crop Recommendation), Sept 2025
- AI Receptive Software Development - Clemson University (via Coursera)
